

ACKNOWLEDGEMENTS

The U.S. Army Center for Health Promotion and Preventive Medicine (USACHPPM) prepared this report under the direction of Dr. Bernard Rostker, Special Assistant to the Secretary of Defense for Gulf War Illnesses, Medical Readiness and Military Deployments.

In January 1998, OSAGWI directed USACHPPM to conduct a human exposure assessment and health risk characterization for military personnel potentially exposed to depleted uranium (DU) during service in Southwest Asia. This review was also a preliminary assessment of future research needs and recommendations for future data collection studies

A team of experts, directed by Mr. David Alberth, coordinated all efforts to prepare the human exposure assessment and health risk characterization requested by OSAGWI. USACHPPM assembled a team of health physicists, toxicologists, industrial hygienists, occupational health physicians, health professionals, and other technical subject matter experts. Principal authors (identified by an asterisk) and members of the technical review team include:

COL Eric G. Daxon, Ph.D., CHP, TSG Consultant for Depleted Uranium

LTC Mark A. Melanson, Ph.D., CHP, formerly of Office of the Surgeon, U.S. Army Materiel Command and currently Health Physics Program Manager, USACHPPM

MAJ Gary J. Matcek, former Health Physics Program Manager, USACHPPM

MAJ Jason D. Dunavant, CHP, Office of the Surgeon, U.S. Army Materiel Command

***David P. Alberth, Senior Health Physicist, USACHPPM**

***LTC Gordon M. Lodde, Medical Service Corps (Ret.), Health Physicist, USACHPPM**

***John W. Collins, USACHPPM**

***Frances Szrom, CHP, USACHPPM**

***Laurie E. Roszell, Ph.D., USACHPPM**

***Kevin M. Delaney, USACHPPM**

***Christopher H. Carroll, MSES, CIH, USACHPPM**

***Mary Ann Parkhurst, Pacific Northwest National Laboratory (PNNL)**

***Richard J. Traub, Ph. D., PNNL, *Robert Scherpelz, PNNL, and *J.G. Droppo, PNNL**

Richard W. Fliszar, U.S. Army Tank-automotive and Armaments Command - U.S. Army Armament Research, Development and Engineering Center (TACOM-ARDEC)

James Elliott, TACOM-ARDEC

Wade Bunting, U.S. Army Heavy Metals Office

The following facilitated document development production:

Cynthia M. Givans, USACHPPM

A. Gail Gibson, Connie S. Trimble, and Jeanette F. England, USACHPPM

Members of the Health Physics Program at USACHPPM

Within the U.S. Army, the following provided review, comments and suggestions:

U.S. Army Tank-automotive and Armaments Command

U.S. Army Medical Command, Office of The Surgeon General

U.S. Army Heavy Metals Office

Within the U.S. Army, the following provided security reviews and recommended changes:

Project Managers for Ground Systems Integration, for the Abrams Tank System, and for Tank and Medium-Caliber Armament Systems

External to the U.S. Army, independent reviews of interim reports included:

L. Max Scott, Ph.D., CHP, and Anthony C. James, Ph.D., and also

the American Institute of Biological Sciences - Scientific Peer Advisory and Review Services
